

Rollable Perimeter Flood Barrier

MEGASECUR

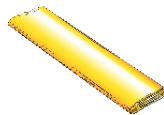

A rapidly deployable, reusable flood barrier that uses water pressure to create proven temporary flood protection.

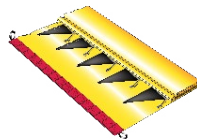

The MegaSecur Water-Gate Flood Barrier is a self-rising flood protection system that uses the weight and pressure of incoming water to create a stable, watertight barrier. Requiring no anchors, power, tools, or heavy equipment, it can be rapidly deployed to help protect communities, facilities, infrastructure, and property from flooding and water intrusion.

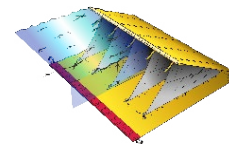

Uncoil Barrier

Barrier Ready

Barrier Filled

Applications

Flood Protection | Water Diversion | Firefighting Water Storage | Pollution Control | Aquatic Projects

Designed for fast emergency response and repeated use, the Water-Gate Barrier is constructed from durable, high-strength PVC-coated polyester fabric that resists corrosion and harsh environmental conditions. Available in individual or boxed configurations, it offers flexible deployment for flood control, water diversion, pollution containment, and temporary water storage applications. The barrier can be driven over by vehicles and instantly returns to its protective position, maintaining continuous flood defense without interruption.

Individual Barriers

Suitable for protecting an area with a smaller surface area or requiring a winding installation, such as around a building.

Pre-attached Barrier Box

Arranged in a box to ensure ease of execution. Pull out part of the barrier and move the box forward along the line of flood protection.

MODEL	APPLICATION	HEIGHTS	LENGTHS
WX	Water Diversion	6", 14", 20"	17', 30', 50'
WA	Stream Damming	15", 21", 28", 39", 50", 60"	15', 25', 50'
WL	Flood Protection	14", 20", 26", 32", 39", 50", 60"	17', 30', 50'
WT	Spill Containment	21", 28", 39"	25', 35', 50'

Footprint width is typically 3–4 times the barrier height

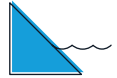

Can be connected to create custom lengths for flexible flood protection configurations.

FEATURES

Fast Deployment

100+ Feet Installed In
Under 5 Min

Anchor-Free

Water Stabilized, No
Ground Anchors

Portable

Compact Storage,
Easy Transportation

Vehicle Access

Drive Over Without
Removing Barrier

Reusable

Hundreds Of Uses,
20+ Year Lifespan

Scientific research & testing
ensures products conform to
highest standards of safety &
property loss prevention.
