

## The most floodproofing solutions under one roof

Floodproofing.com manufactures and distributes some of the most innovative floodproofing products available. With commercial and residential options for retrofits and new construction, we're sure to have a solution to protect your property while meeting the latest codes and regulations. Our solutions, many of which are FM-approved, have been tested to withstand floodwater and debris in the toughest situations.

# Portfolio of Products

## DEPLOYABLE SYSTEMS

A custom-engineered, lightweight barrier that protects any sized opening against floodwater & damage.

- Customizable sizes
- Toolless deployment
- No permanent brackets

A customizable, stackable aluminum flood barrier that is a time-tested solution for flood prone locations.

- Multiple mounting options
- Customizable sizes
- Long, proven history

## DEPLOYABLE SYSTEMS

Removable aluminum flood wall, custom-engineered for larger applications and higher protection.

- Engineered for higher protection
- Minimally visible base plates
- Angle braces options for support

A ready-to-use flood barrier for doors & entryways that can easily be deployed in just minutes.

- No permanent fixtures
- Protects up to 28"
- Extension poles available

## PASSIVE SYSTEMS

A low-maintenance, self-clearing automatic flood barrier that remains hidden until activated by floodwater.

- No height or width limits
- No human intervention
- Underground until triggered

## PASSIVE SYSTEMS

Impact-rated, floodproof window systems provide clarity, beauty, & passive protection at all times.

- Truly passive solution
- Fully customizable options
- Factory-glazed system

A glass flood wall that provides passive protection along coastal environments without obstructing views.

- Truly passive solution
- Fully customizable options
- Factory-glazed system

A vertically-lifted barrier that utilizes flood water to lift itself into position & seal off an opening during flooding.

- Hidden until activated
- No human intervention
- Customizable sizes

## POINT-OF-USE SYSTEMS

Heavy engineered industrial-level flood protection. Flood gates, doors, & hatches that fit any application

- *Completely customizable*
- *Engineered for any application*
- *Multiple operation options*

A pedestrian door that operates as a flood barrier when activated & is perfect for critical infrastructure.

- *Operates as a standard door*
- *Glass port, panic bars, & locks*
- *Powder coat paint available*

## FLOOD VENTS

Flood vents protect enclosures by allowing automatic bi-directional water flow equalizing hydrostatic pressure.

- *ICC-ES certified flood protection*
- *Commercial configurations*
- *316L marine-grade stainless steel*

## PERIMETER FLOOD BARRIERS

A high-strength, modular barrier system designed to accommodate various obstacles and terrains.

- *Modular with no fill material*
- *Easily deploy, collapse, & store*
- *Variety of liner options*

A rigid, connectable water-filled flood barrier engineered to withstand rushing or standing water.

- *Ideal for long runs*
- *Multiple standard sizes*
- *Variety of liner options*

A long, flexible tube which can quickly be joined end-to-end, stacked & filled with water.

- *Can fit any shape or angle*
- *Multiple standard sizes*
- *Connect to any length*

A connectable flood barrier with corner & wall returns & alternating, self-filling pods speeding up deployment.

- *Alternating barriers fill & empty*
- *Built in gaskets, liner not required*
- *Bends, corners, & wall connections*

A fillable, multi-cell barrier system, designed for long-run applications that can be stacked to any height.

- *Engineered for stability*
- *Multiple standard sizes*
- *Connect to any length*
