

OVERSIZED FLOOD BARRIER AND WINDOW

Description

A passive system that is always ready

Unique design with multiple options

No storage required

No installation before storm and removal after the storm

Does not interfere on the walkway

Can be installed easily where other systems have problems
(pool, landscaping, etc.)

Up to 4' of water

Testing for flood with impact

Can be used as a fence in front of a beach lot

Protect your investment and your inventory from flooding

Potential Use Cases:

- Commercial or Residential
- Public building
- Government building
- Commercial building
- Hospitality
- Near ocean or canal
