

Mega Flood Log

The Mega Flood Log is a modular, customizable flood barrier comprised of 12" stackable aluminum logs and is designed to withstand high-velocity water and heavy impact forces. This solution is an ideal flood protection option due to its ease of installation and deployment, customization capabilities, and space-saving storage. The Mega Flood Log is a time-tested solution for protecting openings from floodwater and debris, whether a door or window, garage entry or perimeter array.

KEY FEATURES AND BENEFITS

- 12" logs make for quicker deployment
- Color-coded and labeled for ease
- No bottom anchors for bottom logs
- Storage options available such as racks or shelving
- Heavy duty materials for long lasting protection
- Custom incremental deployment options available

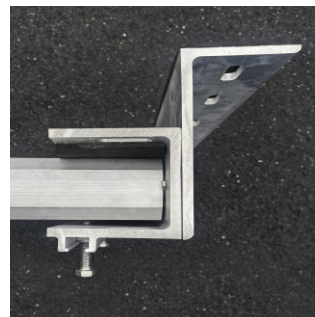

FLOOD PROTECTION SIMPLIFIED

12" high logs for faster deployment & easier storage

- 6" toppers for half foot heights available

Completely customizable to fit project needs

- Customize lengths or add midspan posts
- Multiple Mounting Options
- Custom Size Wall Plate Attachments

Materials

Logs

- ASTM B209/B209M, Alloy 6061, Temper T6

Posts

- ASTM B209/B209M, Alloy 6061, Temper T6
- Painted Steel Grade ST37
- Galvanized Steel

Customization

Wall Mounts

- Interior Mount
- Extended Offset Mount
- Custom Interior Mount
- Custom Jamb Mount

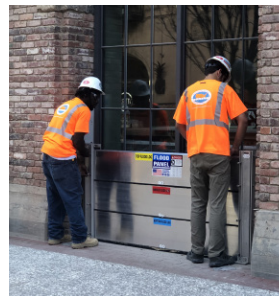

Wall Plates

- Primed Steel Wall Plates
- L Angle Wall Plate
