

Portfolio of Products

Design, Supply, & Installation

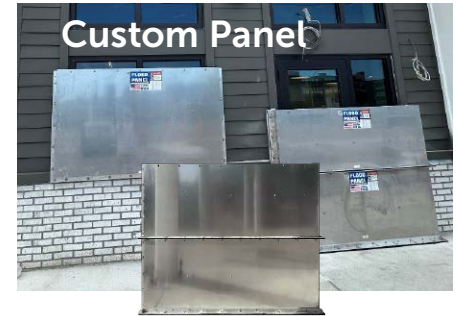

Floodproofing.com manufactures and distributes some of the most innovative floodproofing products available. With commercial and residential options for retrofits and new construction, we're sure to have a solution to protect your property while meeting the latest codes and regulations. Our solutions, many of which are FM-approved, have been tested to withstand floodwater and debris in the toughest situations.

DEPLOYABLE SYSTEMS

A customizable, stackable aluminum flood barrier that is a time-tested solution for flood prone locations.

- Multiple mounting options
- Customizable sizes
- Long, proven history

A customizable, aluminum flood panel that is a time-tested solution for flood prone locations.

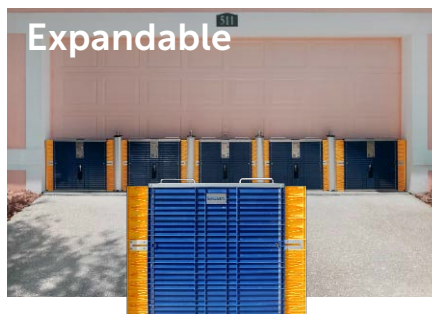

- Multiple mounting options
- Customizable sizes
- Conforms to sloped ground

DEPLOYABLE SYSTEMS

Removable aluminum flood wall, custom-engineered for larger applications and higher protection.

- Engineered for higher protection
- Minimally visible base plates
- Angle braces options for support

A ready-to-use flood barrier for doors & entryways that can easily be deployed in just minutes.

- No permanent fixtures
- Protects up to 28"
- Extension poles available

PASSIVE SYSTEMS

Impact-rated, floodproof window systems provide clarity, beauty, & passive protection at all times.

- Truly passive solution
- Fully customizable options
- Factory-glazed system

PASSIVE SYSTEMS

A glass flood wall that provides passive protection along coastal environments without obstructing views.

- Truly passive solution
- Fully customizable options
- Factory-glazed system

A low-maintenance, self-clearing automatic flood barrier that remains hidden until activated by floodwater.

- No height or width limits
- No human intervention
- Underground until triggered

A vertically-lifted barrier that utilizes flood water to lift itself into position & seal off an opening during flooding.

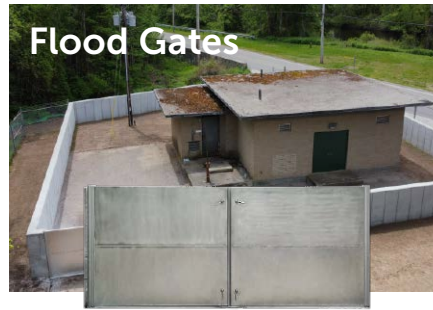

- Hidden until activated
- No human intervention
- Customizable sizes

POINT-OF-USE SYSTEMS

A pedestrian door that operates as a flood barrier when activated & is perfect for critical infrastructure.

- Operates as a standard door
- Glass port, panic bars, & locks
- Powder coat paint available

A permanent gate that operates as a flood barrier when closed & is perfect for critical infrastructure.

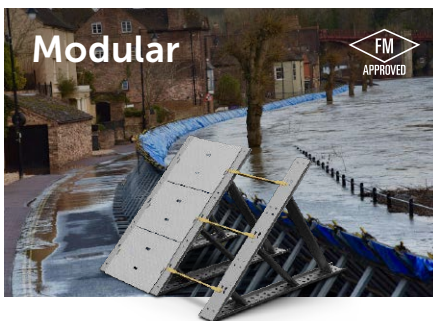

- Completely customizable
- Engineered for any application
- Multiple operation options

Heavy engineered industrial-level flood protection. Flood gates, doors, & hatches that fit any application

- Completely customizable
- Engineered for any application
- Multiple operation options

PERIMETER FLOOD BARRIERS

A high-strength, modular barrier system designed to accommodate various obstacles and terrains.

- Modular with no fill material
- Easily deploy, collapse, & store
- Variety of liner options

A rigid, connectable water-filled flood barrier engineered to withstand rushing or standing water.

- Ideal for long runs
- Multiple standard sizes
- Variety of liner options

A fillable, multi-cell barrier system, designed for long-run applications that can be stacked to any height.

- Engineered for stability
- Multiple standard sizes
- Connect to any length

PERIMETER FLOOD BARRIERS

A long, flexible tube which can quickly be joined end-to-end, stacked & filled with water.

- Can fit any shape or angle
- Multiple standard sizes
- Connect to any length

A connectable flood barrier with corner & wall returns & alternating, self-filling pods speeding up deployment.

- Alternating barriers fill & empty
- Built in gaskets, liner not required
- Bends, corners, & wall connections

FLOOD VENTS

Flood vents protect enclosures by allowing automatic bi-directional water flow equalizing hydrostatic pressure.

- ICC-ES certified flood protection
- Commercial configurations
- 316L marine-grade stainless steel
